EUROMEDIC OPENS ITS SECOND DIALYSIS CENTRE IN THE UK IN LEICESTER

Euromedic has announced the opening of its second mobile dialysis centre in the city of Leicester. The centre is part of the framework contract with University Hospitals Leicester NHS Trust for the provision of haemodialysis treatments across the East midlands renal dialysis network. The East Midlands renal dialysis network provides for the population of the east midlands covering all of Leicestershire, Lincolnshire, parts of Cambridgeshire and North Northamptonshire.

IDC Leicester is an innovative mobile unit, replicating the model IDC Corby which was commissioned in September 2008. The unit is equipped with 8 state of the art dialysis stations and water purification system. The centre will provide for up to 48 patients (over 6,000 treatments annually) ahead of a 30 station newly built fixed centre which is due to open later in 2009.

This new centre extends Euromedic's network of medical centres to 189 (93 Diagnostic, 62 Dialysis, 32 Clinical Laboratories and TWO Cancer Treatment Centres) located in 15 countries in Europe.
