EUROMEDIC'S 200th CENTRE "MEDICON" LABORATORY IN PRAGUE, CZECH REPUBLIC

Euromedic has announced the completion of its acquisition of "Medicon" Laboratory, the Company's 200th Medical Centre, in the city of Prague, in the Czech Republic.

Medicon Laboratory has a well established brand, as it was part of the largest private out-patient medical service provider in the Czech Republic and has over 30 years of distinguished service to the community. The Lab provides a wide range of high quality clinical investigations in biochemical, hematological and immunological specialties and is equipped with state-of-the-art laboratory technique and systems. In addition, because of the close proximity to Euromedic's existing Prague Lab, the company plans to integrate the operations in the coming months making it one of the largest laboratories in the country. This year the lab with its staff of 29 medical professionals will perform over two million clinical examinations.

Euromedic now owns and operates a network of 200 medical centres (100 Diagnostic, 65 Dialysis, 33 Clinical laboratories and two Cancer Treatment Centres) in 15 countries in Europe, including 14 in the Czech Republic (13 Labs and One multi-modality Diagnostic Centre).
