EUROMEDIC ACQUIRES “LABLINK” LABORATORY IN DUBLIN, IRELAND

Euromedic has announced the completion of its acquisition of “Lablink” Laboratory in Dublin, Ireland. The acquisition was strategic for the company as it now entered a new line of specialized medical service in the country; in addition to the six imaging diagnostic centres Euromedic currently owns and operates in the country. Lablink was established in 2001 by a team of medical professionals with extensive experience in the clinical and corporate healthcare sectors. The commitment of the company is to provide a unique streamlined clinical laboratory service.

Lablink’s primary focus is to provide a complete service encompassing all aspects of laboratory analysis from collection of samples to reporting. A major component of this type of service involves fast tracking and reporting of accurate, accredited results, which enables Euromedic to provide a highly streamlined system through electronic requesting of tests, bar coding of samples and electronic turnaround of results. Reports are sent electronically to the referrers desktop and integrated into their patient management system. Lablink is one of the market leaders in Corporate Health Screening and Occupational Health Services and this year the Lab with its staff of 19 medical professionals will perform over 250,000 clinical examinations.

Euromedic owns and operates 175 medical centres (92 diagnostic, 54 dialysis and 29 clinical laboratories) in 15 countries in Europe.
