“IATRIKI DIASTASIS” A PREMIUM CENTER IN ATHENS BECOMES THE 10TH CENTER OF EUROMEDIC GREECE

Today, Euromedic announced its network expansion in Greece with the completion of the acquisition of “Iatriki Diastasis” Diagnostic Center and Clinical Laboratory in the suburb of Vari in Athens.

“Iatriki Diastasis” is a luminary multimodality center located in South East Athens, equipped with state-of-the-art Siemens Imaging equipment including: 1.5 Tesla MRI, multislice CT, dual head gamma camera, digital RF unit, mammography, GE manufactured Ultra Sound, Echo Doppler and Bone Densitometer and Premium Roche laboratory analyzers. In addition, the center plans to install the first digital mammography in the region in September. The medical team of the center under the leadership of Professor Pouliadis conduct over 90,000 Diagnostic/Laboratory examinations per year and has developed a strong reputation for its distinguished medical services.

This 10th center of Euromedic Greece will enhance the company's position in Athens larger urban area and strengthen the connection between high quality and Euromedic's brand name.

Euromedic owns and operate a pan-European network of 159 centers (80 Diagnostics, 51 Dialysis and 28 Clinical Laboratories) in 15 countries in Europe.
