Euromedic has announced the completion of its acquisition of "Labscreen Diagnostics Group" from Siemens in Hungary. The group consists of three diagnostic centers - two Computerized Tomography centers located in Peterfy Hospital and Karolyi Hospital in Budapest and a multi-modality centre in the county hospital of Salgotarjan. Labscreen which was established in 1996 by Siemens has a team of 64 people who perform over 87,000 diagnostic imaging investigations annually.

The centre in Salgotarjan provides a wide range of diagnostics procedures including: Computerized Tomography (CT) Angio, Mammography, Ultrasound and X-Ray services. The Labscreen Group joins the existing eight diagnostic centers which Euromedic is operating in Hungary. Euromedic owns and operates a network of (170) medical centers (91 Diagnostic, 51 Dialysis and 28 Clinical Laboratories) in 15 countries in Europe.
