EUROMEDIC OPENS NEW MRI CENTRE IN SZCZECIN, POLAND

Euromedic has announced the opening of its newest state-of-the-art MRI (Magnetic Resonance Imaging) centre in Szczecin, Poland. The centre is located in the Szczecin Medical Academy Hospital and will serve both public and private patients.

The Szczecin centre is designed to provide not only traditional MRI investigations but also specialized MRI breast mammography's. These specialized investigations will be conducted in co-operation with the renowned Medical Academy Professor Jan Lubinski (Internationally recognized for his research associated with breast cancer and genes BRCA 1 and BRCA 2 which are responsible for genetic inheritance of the disease). The

team will perform a genetic screening of women who have a family history of breast cancer and if they are genetically prone to inherit the disease they will undergo a regularly scheduled Mammography-MRI investigation at Euromedic's centre. The Szczecin centre with its staff of 15 medical professionals will conduct nearly 5,000 MRI investigations annually.

This latest addition extends Euromedic's network of medical centres to 153 (76 diagnostic, 49 dialysis and 28 clinical laboratories) in 14 Countries in Europe.
